

# Wenger Corporation, Owatonna

**Patrick Gibbons**

*Chemical Engineering, University of Minnesota*

*Daniel Chang, MnTAP Advisor*

## Organization

Wenger Corporation is an internationally recognized manufacturer of custom equipment and products for music education, performing arts, and athletics.

## Intern Project

Identify solutions to reduce wood waste generation and disposal and increase energy efficiency throughout the facility.

## Incentives to Change

Wenger Corporation strives to be environmentally responsible in order to achieve their goal of becoming a leader in sustainability while also saving money.

## Solutions

### Implement Wood Waste Recycling

Manage waste streams and work with a wood recycling company to divert wood waste from landfill disposal and reduce disposal costs.

### Recycle Wooden Block Spacers

Separate and recycle wooden spacers from larger wood waste dumpsters to reduce costly landfill quantities.

### Recover Heat from Air Compressors

Utilize ducting to use heat generated from the air compressors to warm the building during the winter, reducing consumption of natural gas.

### Upgrade Office and Exterior Lighting

Replace fluorescent lights to LEDs to improve energy efficiency and longevity.
