

Strengthening Minnesota businesses by maximizing efficiency and lowering costs through energy, water and waste reduction

**Internship:** Lead a project focused on water conservation at a local beverage bottling facility.

**Company:** Great Lakes Coca-Cola - Eagan, MN

The Minnesota Technical Assistance Program (MnTAP) is seeking a junior or senior college student to lead a project focused on water conservation with Great Lakes Coca-Cola (GLCC) in Eagan, MN. The intern will work with MnTAP and GLCC staff to develop a detailed water balance for the facility. This water balance will help identify areas of the process that have opportunities for water conservation or reuse. The intern will quantify these opportunities and develop suggestions to increase efficiency, as well as outline plans for implementation.

### JOB DUTIES:

As part of this project, you will be asked to complete the following tasks:

1. Identify and quantify water uses throughout the facility.
2. Analyze water used for cleaning/rinsing, product transport and other processes. Determine where water use can be minimized or where water can be reused.
3. Research methods to optimize water treatment systems that feed various on-site processes.
4. Make recommendations for specific improvements based on research and testing that will result in water use reduction, reuse, treatment, or recycling opportunities. Consider energy savings that result from changes, as well.
5. Estimate water reduction and/or reuse potential from implementation of provided recommendations, then prioritize suggested changes using simple payback methods for financial justification.
6. As appropriate, initiate implementation of approved process changes or develop plans for future implementation.
7. Summarize findings in a detailed report, including recommended procedures and vendor proposals along with an economic analysis and justification of changes.
8. Present findings to the company and at MnTAP-hosted public presentation events.

As an intern, you will work at the company and report back to MnTAP. The position is full time, 40 hours per week, for three months to start after the conclusion of spring semester or quarter. Pay is \$15/hour, with a lump sum stipend of \$1,000 upon completion of the project deliverables: a final report and presentations. Cumulatively, this equates to \$17.00/hour when averaged over the project. Candidates must pass a background check and a drug test.

### QUALIFICATIONS:

- Cumulative GPA of at least 3.0
- Good oral & written communication skills
- A technical academic background
- Troubleshooting skills
- Self-motivated
- Excel and other software skills
- Appropriate majors: *Engineering, environmental or physical sciences and others as applicable*

### TO APPLY:

Apply online at:

[www.mntap.umn.edu/intern/student\\_apply.htm](http://www.mntap.umn.edu/intern/student_apply.htm)

Remember to submit your application form, cover letter, resume, and unofficial transcript.

Applications can be addressed to:

Matt Domski, Intern Program Manager

200 Oak Street SE, Suite 350-1

Minneapolis, MN 55455 • [mdomski@umn.edu](mailto:mdomski@umn.edu)

**MNTAP IS THE HIRING BODY: DO NOT CONTACT THE COMPANY**
