

Internship: Lead a project focused on water conservation.

Company: Metal-Matic Inc. - Minneapolis, MN

The Minnesota Technical Assistance Program (MnTAP) is seeking a junior or senior college student to lead a project focused on water conservation with Metal-Matic Inc. The intern will work with MnTAP and Metal-Matic staff to reduce water use throughout the facility. The intern will quantify these opportunities and develop suggestions to decrease usage as well as outline plans for implementation.

JOB DUTIES:

As part of this project, you will be asked to complete the following tasks:

1. Identify and quantify main sources of water use within the facility, including flowrates for each piece of equipment and direction of flow for each heat exchanger.
2. Develop solutions to reduce water use, with a focus on non-contact cooling water.
3. As time allows, investigate other opportunities for pollution prevention.
4. Estimate water reduction potential from implementation of provided recommendations, then prioritize suggested changes using simple payback methods for financial justification.
5. As appropriate, support implementation of approved process changes or outline plans for future implementation.
6. Summarize findings in a detailed report, including recommended procedures and vendor proposals along with an economic analysis and justification of changes.
7. Present findings to the company and at MnTAP-hosted public presentation events.

As an intern, you will work at the company and report back to MnTAP. The position is full time, 40 hours per week, for three months to start after the conclusion of spring semester or quarter. Pay is \$19/hour, with a lump sum stipend of \$1,500 upon completion of the project deliverables: a final report and presentations. Cumulatively, this equates to \$22.00/hour when averaged over the project. Candidates must pass a background check.

QUALIFICATIONS:

- U.S. work authorization
- Good oral & written communication skills
- A technical academic background
- Troubleshooting skills
- Self-motivated
- Excel and other software skills
- Cumulative GPA of at least 3.0
- Preferred majors: *Engineering, environmental or physical sciences and others as applicable*
