

# Aqueous cleaning can be effective for almost every cleaning challenge

The following questions will help companies prepare for next-step conversations with their cleaning suppliers.

How will aqueous support your business plan?

What new equipment is needed?

How many parts? And how fast?

How to dispose of wastewater?

How much floor space is available?

What soils are being removed?

What's the current water quality?

What is the step before cleaning?

How will regulatory requirements change?

How clean do parts need to be?

What parts need to be cleaned?

Is rust/oxidation a concern?

What is the step after cleaning?
